

OpenBOR Launcher Quick Guide

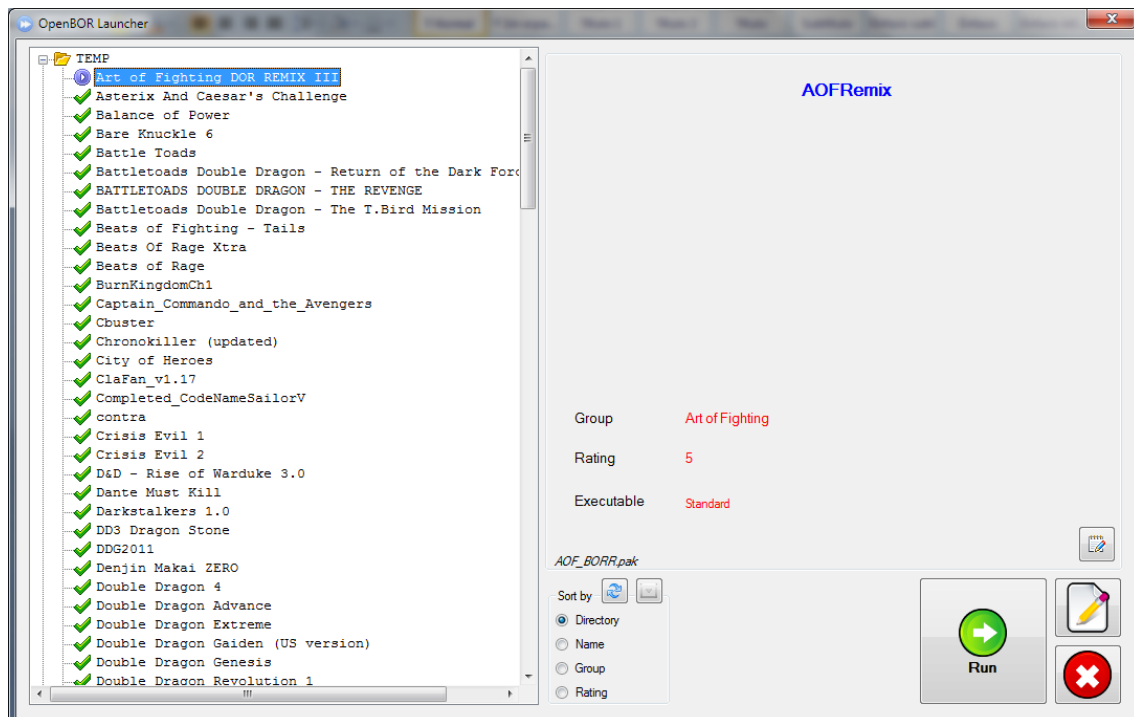

First Run;

Choose the OpenBOR path. The other paths it'll be filled automatically

Press Save Button.

Main Screen;

Right tree; All paks in pak folder. The .pak files must be inside that directory, in other directory. If "Sort By" it's in "Directory", it shows that directory name.

By pressing the edit button it opens the edit buttons to change game's attributes.

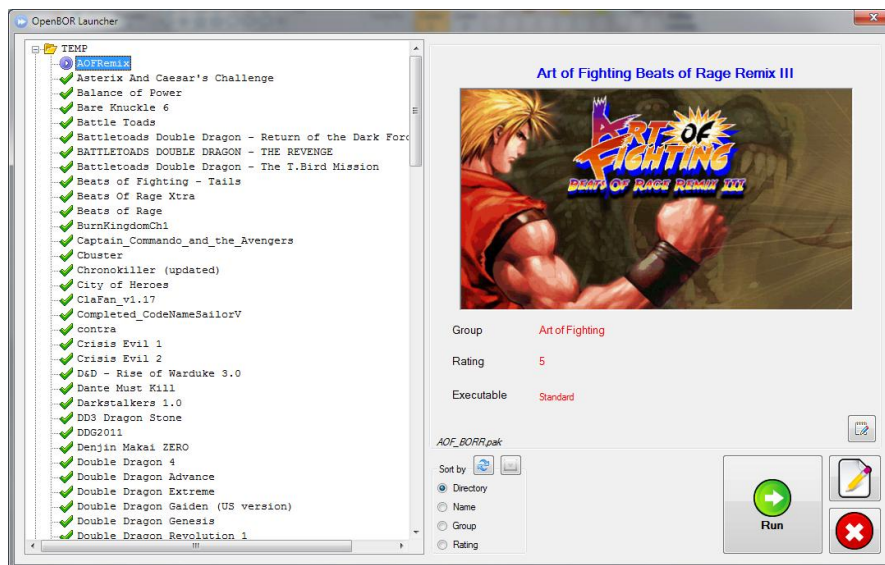

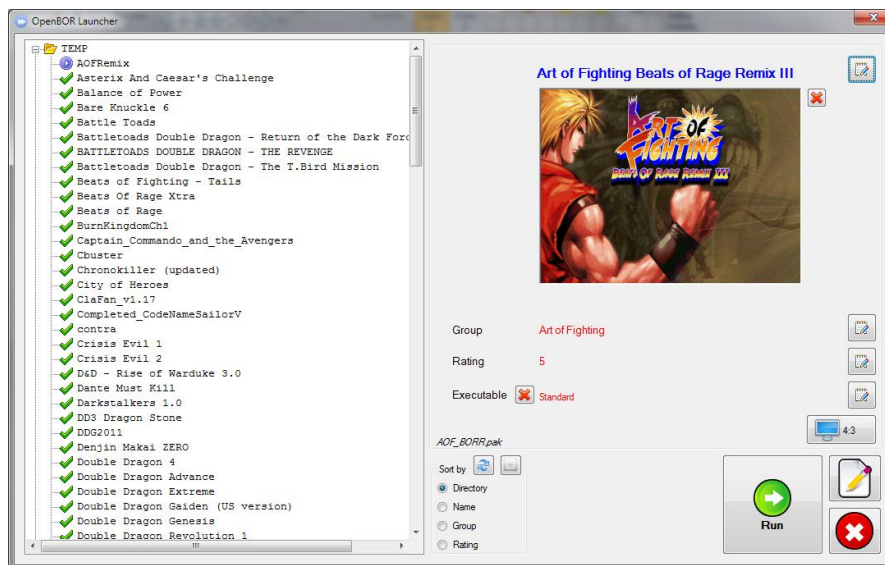

In Top screen it shows the name. Also you can group the game and give it a score (1-5). The "Executable" option changes the OpenBOR.exe in selected directory for the one selected in external window.

NOTE: The alternative executable must contain in it root the "Paks" folder. It should be empty (the game will be copied there and erased after that).

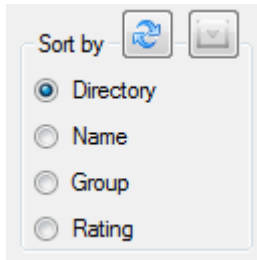

Also, the first screenshot it'll be that game cover.

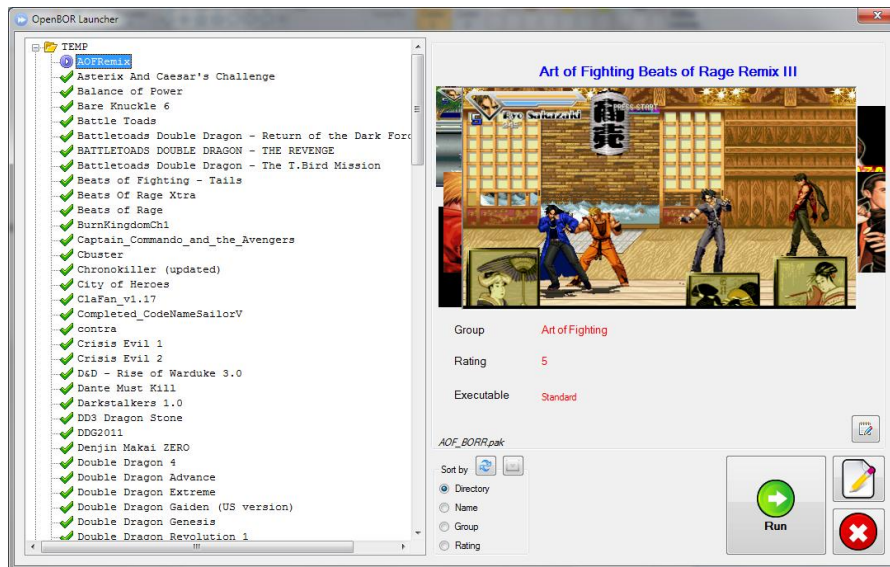

The Screen button switch between 4:3 and 16:9 screenshots aspect ratio.

The list can be refreshed with the appropriate button in the Sort By menu .

If you want to show up to 5 screenshots, press the show all button . To hide the screenshots, press again. By pressing in the screenshot it'll switch with the game cover.

To run a game, just press the “Run” button. OpenBOR will load with that game.
